

London InDesign User Group | Cardiff InDesign User Group: October Plug-in Fest

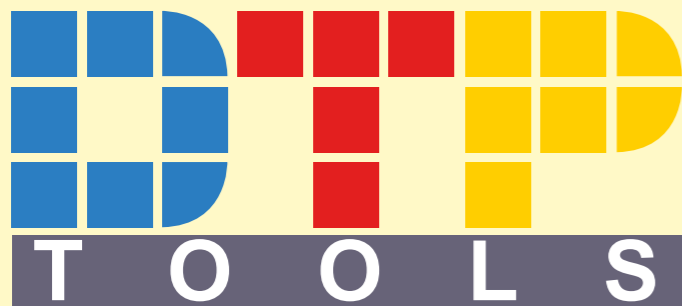

Convert your old Quark documents into shiny new InDesign ones with Markzware's excellent Q2ID plug-in - which really does give you the fastest head-start - in just one click! Read more and watch a video (less than two minutes) and see for yourself by visiting this link:

<http://markzware.com/q2id/overview.php>

Another great product from Markzware is their FlightCheck Professional prepress tool which will check not only PDF files thoroughly and warns you about potential printing problems while guiding you directly to them for repair. Find out more and watch a short video here:

http://www.markzware.com/flightcheck_professional/overview.php

Recosoft's amazing PDF2ID software is capable of recreating the intended construction and layout of documents and forming paragraphs; applying styles; regrouping independent graphic elements; extracting images; creating tables; recovering annotations and other elements automatically. PDF2ID converts every page in a PDF file to an equivalent page in the resulting InDesign document. You can extract text and images or convert the whole thing - links are placed into their own folders numbered as the page they came from - click the image below to find out more about this and Recosoft's other great tools!

You can access the product pages of all of those amazing tools from DTP Tools by clicking any one of the images above, including the extensive Blatner Tools set. If you're at a loss for something to do now you've saved so much time with these great add-ons, or for those of you who could use a little distraction every now and then don't forget that there is a free Tetris plug-in available!

Scott Zanelli's excellent **Page Exporter Utility** is available on the **Adobe Marketplace** - click on this screenshot to visit that page and get it!

RegExr Desktop is a tool by Flash guru **Grant Skinner** for learning, editing, and testing regular expressions (RegEx or RegExp for short) on Mac OSX, Windows, and Linux. It is available as an AIR app (click the image on the right) or as an online tool - <http://www.gskinner.com/RegExr/>
